

James Hargreaves Hall Best Value Policy

Whilst the Village Hall Committee both acknowledges and embraces the principles of best value, we firmly believe that we have, to date, adhered to the basic principles.

A happy, strong, honest and open environment ensures that all ideas are fully debated and suitably challenged.

We have always aimed to adopt the most competitively astute solution to our needs (cost and quality). This is highlighted by our use of members of the committee, the local and adjacent communities of Morcombelake to support our maintenance and improvements to the hall. One excellent example is the arch window, both the frame and stained glass were produced by local artists.

Above all, the commitment and hard work of all involved in running the James Hargreaves Village Hall ensures that we have been and are committed to continuous improvement.

The Committee acknowledge the need for continuous improvement in all that we do. We aim to achieve the correct balance of economy, efficiency, effectiveness, equity and environmental considerations. These principles, originally laid down in the Governing Document will be adhered to in all our decisions.
